Title page,

Item [57], **ABSTRACT**, delete and insert:

-- An illumination optical system for illuminating a surface, to be illuminated, with use of light from a light source. The illumination optical system includes a diffractive optical element for forming a desired light intensity distribution upon a predetermined plane, an angular distribution transforming unit for transforming an angular distribution of light incident or to be incident on the diffractive optical element into a desired distribution, the angular distribution transforming unit also being operable to change the desired distribution, a multiple beam producing unit, wherein the predetermined plate is a light entrance surface of the multiple beam producing unit, and a light projecting element for superposing light rays from the multiple beam producing unit one another on the surface to be illuminated. --.
